Feeding guide

- The feeding rate for your horse will depend on the quality of your roughage and the horse weight, body condition and exercise level. As a general guide, the total daily feed intake should be 2% – 3 % of body weight.
- Ensure a minimum of 1% of your horses' body weight is fed daily as high quality roughage such as hay, chaff or pasture. Daily requirements of Nutramix Horse feeds should be divided and fed twice daily.
- Ensure clean, fresh water is available at all times.
- Introduce Nutramix horse feeds to your horses gradually over a period of 1 – 2 weeks.
- Call a Nutramix representative for more information.

You should feed your horse Nutra Performa Pellets based on their body weight, taking into account their specific needs such as age and activity. The following is a guide for horses with limited or no access to pasture.

Exercise Level	Body Weight				
	300kg	400kg	500kg	600kg	700kg
